Quality products!

A.S. Motorsport takes utmost care to make sure that all our products reliably do what we say they do! We aren't just a performance specialist. We are also car enthusiasts as well, taking pride in our work and customer service.

*All pricing is excluding EU VAT and excluding shipping.
Pricing subject to change without prior notice.*

A.S. Motorsport For all your sports car parts!

A.S. Motorsport

Induction

All ASM induction components are designed and engineered to achieve 2 key improvements over OEM.
Cooler induction temperatures, more efficient engine "breathing" all off-course with OEM reliability and quality.

Throttle body spacers

All TB spacers are made out of plastic to stop heat soak of the throttle body

Product no.	Application	Specification	Remarks	EX VAT Price
Honda/Acura

Braking

Pricing valid for Europe only, for North American clients pricing is different!

Balanced stopping power, all ASM brake kits are designed to retain a stable braking balance throughout the whole system.

We design our brake systems with a built in brake bias specifically for each car's unique balance.

All setups are designed for ease of use and long term reliability & serviceability we have caliper rebuild kits for all our brake kits!

We preset brake bias ether to the most advanced factory specification or to a more aggressive front bias setup.*

A.S. Motorsport can also make a specific brake kit for your car completely setup to your wishes in ether floating piston or ridged caliper layout.
2 piece brake disc diameters from 282-400mm in thicknesses from 22-36mm.

* = only on complete front and rear kits!

Options listed on page 12

OEM Big Brake Kits

Bigger 2 piece discs with machined caliper spacers for OEM calipers

Custom application			<u>We can build a custom OEM bbk to your specifications, please contact us for more details</u>							

Custom BBK

A.S. Motorsport can also design a custom big brake kit for your car, with ether OE style calipers to full racing calipers. You can off-course specify desired bias, discs style (two piece, single, ceramic) and various other options.

We can also make carbon ceramic brake kits for the ultimate in performance and weight reduction.

A.S. Motorsport

Big Brake Kits

Large diameter 2 piece discs with larger calipers mounted on machined adapters,

Recommend front and rear combinations are listed under each other.

For example 355mm 6 piston front and 355mm 4 piston rear

Stainless steel brake lines, and discs included on all kits

Options

What caliper?

In this catalog our 7 main brake calipers are listed, 5 fixed piston and 2 floating calipers.

Here are the details:

Type-II	Twin piston floating, 43/38mm pistons it's a big very reliable caliper great for applications with space constraints.
4 Piston "Acura"	4 piston fixed caliper, 4x40 mm pistons in a large aluminum caliper allow for huge stopping power Acura logo cast on the side.
4 Piston Monoblock	4 piston monoblock caliper, light weight cast aluminum monoblock construction allows for high caliper rigidity.
4 Piston Type-S	4 piston fixed caliper using 4 36mm pistons, great for lightweight application or as heavy duty rear caliper.
XL Singel piston	A large 58mm single piston floating caliper, we use these in-combination with large brake pads for ventilated rear brake applications.
6 Piston Type-A	Light weight aluminum 6 piston caliper with a large selection in brake pads.
4 Piston Type-A	Light weight aluminum 4 piston caliper with a large selection in brake pads, We use these as a rear caliper when used with 6 piston Type-A.

We can make brake kits with any style of caliper from single piston to huge twelve piston calipers.

What Rotor/Disc?

Types: *Reduction of unsprung weight is critical in maximizing performance!*

(1P)	Single piece	Easier installation and are more economical they do weigh more they also give a OEM look.
(2P)	Two piece	Substantial weight savings, custom/race look.

Style: *contact us for details*

Plain	Standard finish on our larger singel piece rotors (320,330,305), optional on 2 piece rotors.	
Slotted	Standard on our 282 and 300 rotors singel piece rotors and all 2 piece rotors.	< ASM recommends slotted rotors
Drilled	Optional on our singel piece rotors and on certain 2 piece rotors.	
Slotted and Drilled	Optional on our singel piece rotors.	

Finish: *contact us for details*

Bare	Bare metal rotor finish. (standard finish on all rotors)
Black coating	Rotors are coated, this will stop rust from forming on the outer edge and bell. (optional on single piece)
Zinc	Zinc coating gives a silver/gray protection against rust.

Spacers, Brackets, Calipers and 2 piece hubs have a standard silver/gray finish

Caliper Options:

Pads

Sport brake pads are included with all calipers, unless other wise stated
These are great for aggressive street driving and light autocross/track use.
Other pad compounds are available please contact us.

Color/Finish

All A.S.M. Brake products have a standard silver finish, Cost extra options below:
€ 25,00 High gloss Blue, Red, Yellow
€ 30,00 Color match to car color. *(paint not suitable for heavy duty conditions)*
